

# A26 Gas monitoring system **delivered**

**In 2018 Saab awarded Analox Military Systems a contract to supply gas monitoring systems for the Blekinge-class (A26) of next-generation submarines.**

From understanding concepts, creating initial ideas and finally discussing through life capabilities, Analox engineers have designed a system utilising PLC's and various sensor technologies enabling the gas monitor to be truly personalised to Saab's requirements.

Analox are proud to support in specifying submarine atmosphere monitoring requirements. Offering flexible system architecture designed to satisfy specific technical requirements with the ability to maintain in-country providing self-sufficiency, minimising spares and downtime.
